

ANEES AMER MOHAMMED ALI

FULL-STACK SOFTWARE DEVELOPER

Phone: 776434968 | Email: anisamer.dev@gmail.com | GitHub: github.com/AneesAhshawafi

PROFESSIONAL SUMMARY

Full-Stack Developer with a solid foundation in building web and mobile applications. Dedicated to taking ideas from concept to deployment while maintaining code quality and creating user-friendly interfaces. Eager to collaborate with teams, adapt to modern tools, and continuously improve technical skills within a professional environment.

EDUCATION

Bachelor's Degree in Information Technology Engineering (IT): University of Taiz — Faculty of Engineering and Information Technology, Yemen.

TECHNICAL SKILLS

- **Web Development:** Strong foundation in **PHP** and **Laravel** framework (Laravel 12), Practical experience with WordPress, AJAX, and familiarity with Odoo ERP.
- **Mobile App Development:** Developing cross-platform mobile applications using Flutter.
- **Desktop Application Development:** Building functional desktop applications using C# and Entity Framework.
- **Databases:** Designing and managing databases (**MySQL, Oracle, Supabase, Firebase, Microsoft Access, SQLite**).
- **Automation & Tools:** Automating workflows using **n8n** and working with **Claude Code CLI**.

MANAGEMENT & LEADERSHIP

- **Project Management via GitHub:** Proficient in managing projects using (**GitHub Issues, Projects, Milestones**) to organize tasks and track progress.
- **Team Leadership:** Experienced in leading development teams, assigning technical tasks, and overseeing deployment processes.
- **Collaboration:** Strong skills in handling (**Pull Requests, Branching Strategies**) and conducting code reviews to ensure quality standards.
- **Effective Communication:** Ability to coordinate between technical teams and stakeholders to ensure accurate delivery of project goals.

KEY PROJECTS

- **ElectroMart Project:** A B2C e-commerce platform developed using Odoo ERP; designed to integrate sales, inventory management, and accounting in a unified environment.
- **Shams Platform:** An e-commerce marketplace specialized in solar energy solutions in Yemen, focusing on building trust and verification between suppliers and customers.
- **Software Engineering Project (Deployment Team Leader):** Led a technical team responsible for system deployment, managing communication between developers and operations teams to ensure server stability and executing rollback plans.
- **ScheduleApp:** An integrated system for managing university schedules and venues, developed using C# and Entity Framework.
- **Financial Management System:** A comprehensive software application managing financial operations and tracking debts and transfers with high accuracy using PHP for back-end and HTML, CSS and Javascript for front-end.

PROFESSIONAL STRENGTHS

- Effectively solving complex technical problems.
- Commitment to best practices in coding (Clean Code).
- Continuously keeping up with artificial intelligence technologies and applying them to enhance development productivity.

LANGUAGES

- **Arabic:** Native Language.
- **English:** Advanced Level (for technical and professional)
